

Sri Lanka Clinical Trials Registry Progress Report

Trial registration Number: SLCTR/2018/007

Title of the trial: Efficacy and safety of once weekly thyroxine versus daily thyroxine as maintenance therapy of hypothyroidism: a randomized controlled exploratory clinical trial

Time period covered by the progress report: from 09.02.2018 to 28.02.2019

1. **Date of commencing research activities:** 17.07.2018
2. **Institution / setting where the research is carried out:** Colombo South Teaching Hospital
3. **Brief description of research activities carried out during the period under review:**

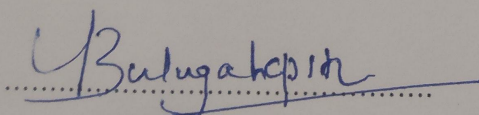

3.1 State of the study:recruiting

3.2 Details :

	09.02.2018 to 28.02.2019	Total from 09.02.2018 to 28.02.2019
Number recruited	26	26
Number screened	79	79
Screen failures	53	53
Number completed trial	09	09
Lost to follow up	01	01

4. **Presentations / Publications / Communications arising from the trial during the project report period covered:** None
5. **Is the work on schedule?**Yes
6. **Is there any significant deviation from the original work plan?** No
7. **Briefwork plan for the next 12 months:**

Screening of patients will be continued and those who are eligible will be recruited to the trial.
Aim is to recruit 4 – 5 patients per month.

Dr. Uditha Bulugahapitiya (Principal Investigator)

Date: 02.04.2019
