At completion

---

### 1. Baseline data

Any changes to the trial design/ methodology/ protocol after commencement:

**It was not possible to apply the Ansiedad / Depresión and Spirituality questionnaires upon admission of patients to the emergency service, due to the state of anxiety and instability of the patients and the lack of personnel of this project to apply them, they were only applied between on the fourth and seventh day after admission to the hospital.**

Any changes to trial outcomes after commencement:

### 2. Current status

Recruitment status: pending/ recruiting/ recruitment complete: follow up continuing/ recruitment complete: follow up complete/ **recruitment suspended** / recruitment terminated

Number assessed for eligibility: **134**

Number recruited and allocated/randomized: **111**

Number allocated/randomized to each intervention/arm (please edit as relevant):

Arm 1: **56**

Arm 2: **55**

Losses/exclusions after allocation/randomization (please edit as relevant):

Arm 1: **12**

Arm 2: **11**

### 3. Trial output

Date of trial completion ("last patient, last visit"): **28<sup>st</sup> May 2021**

Final sample size: **111 patients**

Summary of Interim/Final data (if available):

The recruitment of patients was suspended because the vast majority were arriving already vaccinated against Covid-19. We are beginning the data analysis and the follow-up of sequelae in the patients has yet to be completed in the next four months.
