

Progress Report: Sri Lanka Clinical Trials Registry

SLCTR registration number: AAPL/2023/034

Scientific title of trial: Quality of life in children with molar incisor hypomineralization (MIH) in permanent anterior teeth treated with infiltrative resins: a quasi-experimental study.

Date of commencement (enrolment of first participant): 04/01/24

Progression: 6 months 1 year 2 years 3 years
At completion

1. Baseline data

Any changes to the trial design/ methodology/ protocol after commencement: Due to the small sample size at this moment we will do a second recruitment phase.

Any changes to trial outcomes after commencement: Not applicable

2. Current status

Recruitment status: recruiting

Number assessed for eligibility: 17

Number recruited and allocated/randomized: 17

Number allocated/randomized to each intervention/arm (please edit as relevant):

Arm 1: 8 participants

Arm 2: 3 participants

Arm 3: 6 participants

Losses/exclusions after allocation/randomization (please edit as relevant):

Arm 1: 0 participants

Arm 2: 0 participants

Arm 3: 0 participants

3. Trial output

Date of trial completion ("last patient, last visit"): Recruitment continuing

Final sample size: Not applicable

Summary of Interim/Final data (if available):

We already concluded the first phase of recruitment and follow ups, starting the analysis of results and the second recruitment phase.

Abstract presentations of results at scientific meetings

Note: please include a URL link or scanned copy of the abstract

Title of Abstract	Full citation (please include authors, date, title of conference and place of presentation, page number of abstract).
	At this moment not applicable

Publications

Note: please include a URL link or scanned copy of the publication

Title of paper	Full citation (please include authors, title of journal, volume, issue and page numbers, and/or DOI)
	At this moment not applicable
