

Progress Report: Sri Lanka Clinical Trials Registry

SLCTR registration number: SLCTR/2014/012

Scientific title of trial: Randomized controlled parallel arm clinical trial comparing the effectiveness, safety, cost and acceptability of salbutamol aerosol inhaler and salbutamol tablet in the management of acute exacerbation of bronchial asthma in children

Date of commencement (enrolment of first participant): 1st July 2014

Progression: 6 months **1 year** 2 years 3 years
At completion

1. Baseline data

Any changes to the trial design/ methodology/ protocol after commencement: Yes. The trial centres were expanded, recruitment is stopped from the first centre. Due to annual transfers of the Co-PI. ERC approval was obtained

Any changes to trial outcomes after commencement: No

2. Current status

Recruitment status: pending/ **recruiting**/ recruitment complete/ recruitment suspended / recruitment terminated

Number assessed for eligibility: About 90

Number recruited and randomized: about 60

Number allocated to each intervention/arm: About 28 vs. 32

Losses/exclusions after randomization: None

3. Trial output

Summary of Interim/Final data (if available): Not available

Presentations of results at scientific meetings: Not yet

(Please attach a scanned copy or link to abstract)

Publications: Not yet
(Please attach a scanned copy or link to paper)
