

## Progress Report: Sri Lanka Clinical Trials Registry

---

SLCTR registration number: SLCTR/2015/001

Scientific title of trial:

A randomized, controlled double-blind study comparing the efficacy and safety of voclosporin (23.7 mg BID, or 39.5 mg BID) with placebo in achieving remission in patients with active lupus nephritis.

Date of commencement (enrolment of first participant): First patient was screened on 10 Feb 2015 and randomized on 23<sup>rd</sup> of Feb 2015

Progression: 6 months       1 year       2 years       3 years

At completion

---

### 1. Baseline data

Date of commencement:

- First patient was screened on 10 Feb 2015 and randomized on 23<sup>rd</sup> of Feb 2015

Any changes to the trial design/ methodology/ protocol after commencement:

- Yes-Separate form with the changes is attached

Any changes to trial outcomes after commencement:

- NO

### 2. Current status

Recruitment status:

- Recruiting

Number assessed for eligibility:

- 22 Patients ( Sri Lanka )

Number recruited and randomized:

- 9 Randomized ( Sri Lanka )

Number allocated to each intervention/arm:

- Blinded

Losses/exclusions after randomization:

- 12 patient screen failed, discontinued-1 and early terminated – 1 ( Sri Lanka )

### 3. Trial output

Summary of Interim/Final data (if available):

- Not available

Presentations of results at scientific meetings:

- Not available

Publications:

- Not Available
