

Sri Lanka Clinical Trials Registry Progress Report

Trial registration Number: SLCTR/2015/010

Title of the trial: Tolerability and effectiveness of every-other-day atorvastatin dosing in patients with statin related muscle disease: a randomized controlled clinical trial

Time period covered by the progress report: from 01.01.2016 to 31.12.2016

1. **Date of commencing research activities:** 25.05.2015
2. **Institution / setting where the research is carried out:** Colombo South Teaching Hospital and University of Sri Jayewardenepura
3. **Brief description of research activities carried out during the period under review:**

- 3.1 State of the study: recruiting
- 3.2 Details :

	01.01.2016 to 31.12.2016	Total 25.05.2015 to 31.12.2016
Number recruited	36	61
Number screened	884	1195
Screen failures	848	1134
Number completed trial	37	47
Lost to follow up	01	02

4. **Presentations / Publications / Communications arising from the trial during the project report period covered :**
 - i. Wijekoon CN, Wijekoon PWMCSB, Sumanadasa S, Bulugahapitiya U, Wijayawardena S, Pathirana N, Samarasinghe M, Senarath U. Statin-related muscle disease in clinical practice: a descriptive study in a group of Sri Lankan patients. Proceedings of the 129th Anniversary International Medical Congress of the Sri Lanka Medical Association, July 2016:102-103 (OP 002)
 - ii. Wijekoon CN, Wijekoon PWMCSB, Wickramasinghe MC, Paranavitane SA, Kottage A, Sumanadasa S, Bulugahapitiya U, Senarath U. Risk factors for muscular symptoms associated with atorvastatin therapy: evidence from an observational study in a group of Sri Lankan patients. Proceedings of the 49th Annual Academic Sessions of Ceylon College of Physicians; September 2016: 112 (PP 29)

5. **Is the work on schedule?** Yes
6. **Is there any significant deviation from the original work plan?** No

7. Brief work plan for the next 12 months:

The screening will continue at the medical and diabetic clinics at Colombo South Teaching Hospital and eligible patients will be recruited. Aim is to recruit around 5 patients a month. Recruited patients will be followed up according to the protocol.

Dr. CN Wijekoon (Principal Investigator)

Date: 12.01.2017
