

Progress Report: Sri Lanka Clinical Trials Registry

SLCTR registration number: SLCTR/2016/006

Scientific title of trial: Randomized clinical trial on the effects of tranquilizing classical music on pain, mood and anxiety modulation in cancer patients

Date of commencement (enrolment of first participant): 15th June 17

Progression: 6 months 1 year * 2 years 3 years

At completion Awaiting detailed statistical analysis to be published

1. Baseline data

Any changes to the trial design/ methodology/ protocol after commencement:

Any changes to trial outcomes after commencement: Yes (Communicated with SLCTR)
Detailed application annexed. (**Annexure 1**)

2. Current status

Recruitment status: pending/ recruiting/ recruitment complete/ recruitment suspended / recruitment terminated - Completed

Number assessed for eligibility: 30

Number recruited and randomized: 24

Number allocated to each intervention/arm: 24

Losses/exclusions after randomization: 0

3. Trial output

Summary of Interim/Final data (if available):

Presentations of results at scientific meetings: Two conference abstracts selected of the initial stage (assessing only the immediate effect) are attached.

- A) Wonca Europe (World Family Doctors Conference), Czech Republic 28th June – 1st July 2017 – 5 Minutes Single Slide Oral Presentation (**Annexure 2** - elected abstract)
- B) Asia Pacific Hospice and Palliative Care Conference (APHC), Singapore – 26th - 29th July 2017 – Poster Presentation (**Annexure 3** - elected abstract)

The presentations to be done will carry the findings of the detailed trial assessing the effect of music over 24 hours. (**Annexure 4** – Presentation Slide for Wonca – A similar slide is expected to be designed for APHC and **Annexure 5** – Content of oral presentation)
