Progress Report: Sri Lanka Clinical Trials Registry

| SLCTR registration number: Primary Care Strategies to Reduce High Blood Pressure: A Cluster Randomized Trial in Rural Bangladesh, Pakistan and Sri Lanka | | |
|---|-------------------------------|-----------------------|
| Scientific title of trial: SLCTR/2016/005 | | |
| Date of commencement (enrolment of first participant): 08 May 2016 | | |
| Progression: 6 months □ 1 year x | 2 years □ | 3 years □ |
| At completion □ | | |
| 1. Baseline data | | |
| Date of commencement: 08 May 2016 | | |
| Any changes to the trial design/ methodology/ protocol after commencement: Yes. Amendment to the protocol (protocol version 2.0). | | |
| Any changes to trial outcomes after commencement: No | | |
| 2. Current status | | |
| Recruitment status: Recruitment completed | | |
| Number assessed for eligibility: 2308 | | |
| Number recruited and randomized: 854 | | |
| Number allocated to each intervention/arm: usual care, intervention - Usual care -423: Intervention 431 | | |
| Losses/exclusions after randomization: 49 | | |
| 3. Trial output Summary of Interim/Final data (if available): Not ava Presentations of results at scientific meetings: Not ava Publications: 1. Jafar TH¹, de Silva A, Naheed A, et al. Journal Sep;34(9):1872-81. doi: 10.1097/HJH.000000 | railable of Hypertension. | 2016 |
