

Progress Report: Sri Lanka Clinical Trials Registry

SLCTR registration number: SLCTR/2017/030

Scientific title of trial: An investigator initiated and conducted, multicentre, international, double-blinded, placebo-controlled, parallel-group, randomised controlled trial to determine the effect of more intensive blood pressure control provided by a fixed low-dose combination blood pressure lowering pill ("Triple Pill") strategy on top of standard of care, on time to first occurrence of recurrent stroke in patients with a history of acute stroke due to intracerebral hemorrhage.

Date of commencement (enrolment of first participant):

Progression: 6 months 1 year 2 years 3 years
At completion

1. Baseline data

Date of commencement: The first subject was randomized on 17 Oct 2017 at site 94024 - Kurunegala Teaching Hospital

Any changes to the trial design/ methodology/ protocol after commencement: None

Any changes to trial outcomes after commencement: None

2. Current status

Recruitment status: Recruiting

Number assessed for eligibility: 30

Number recruited and randomized: 22

Number allocated to each intervention/arm: Data not available as study is double blind. The randomization ratio will be 1:1

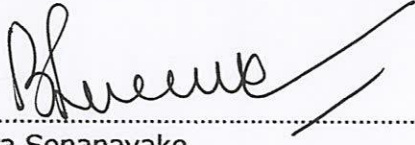

Losses/exclusions after randomization: 00

3. Trial output

Summary of Interim/Final data (if available): NA

Presentations of results at scientific meetings: Not available

Publications: Not available
